

NeuraLaserColor

Color Laser Log Printer from Neuralog

Neuralog, Inc., the Oil & Gas Industry leader for document scanning and digitizing, and the company that brought you the NeuraScanner Log Scanner, now offers the latest technology in color laser log printing. Through a special partnership with Lexmark International, Inc., Neuralog is the exclusive provider of the NeuraLaserColor log printer, patent pending. This cutting edge printing solution will bring high speed color laser log prints to your desktop.

The NeuraLaserColor Log Printer will soon be available for your office. In addition to high-speed log printing, this dual-purpose printer can also accommodate basic office printing and even supports a duplex option. Logs and reports can be printed via USB, ethernet or USB dongle port. NeuraLaserColor prints at speeds of up to seven inches per second in brilliant color and the highest quality.

NeuraLaserColor has a new ergonomic design with easy paper loading and consumable management. Log paper handling is automated through the feeder attachment. Extra high yield all-in-one toner cartridges are cost effective and reduce printer maintenance. NeuraLaserColor is reliable and has a low Total Cost of Ownership.

NeuraLaserColor is a well log printing solution where engineering expertise and industry experience have come together. See a Neuralog representative to find out how to put a NeuraLaserColor in your office.
